

PayForMe Partner Bank API

Version	1.0
Base URL	https://<your-domain>/api/bank/v1
Webhook URL	https://<your-domain>/api/webhooks/bank
Currency	GHS

Banks call PayForMe to credit/debit wallets, execute charges, and report transaction status.

Authentication

x-bank-api-key: <BANK_API_KEY>
Content-Type: application/json

Header	Webhooks only
x-bank-signature: sha256=<HMAC-SHA256(body, BANK_WEBHOOK_SECRET)>	Required if secret configured
x-bank-event-id: <unique-id>	Recommended

HTTP	Code	Meaning
401	BANK_API_UNAUTHORIZED	Invalid or missing API key
503	BANK_API_DISABLED	API not enabled

Response envelope

```
{
  "success": true,
  "message": "Request completed successfully.",
  "data": {},
  "errors": null,
  "requestId": "550e8400-e29b-41d4-a716-446655440000"
}
```

Conventions

Status values: PENDING · PROCESSING · COMPLETED · FAILED · CANCELLED

Idempotency: Every mutating request requires a unique reference (min 6 chars). Repeats with the same reference return 200 and alreadyProcessed: true .

Deposits: Customer transfers to the PayForMe **collection account** with a platform deposit reference. Bank calls `POST /deposits` on confirmation.

Endpoints

GET /health

Connectivity check. No API key required.

Response 200

```
{
  "status": "ok",
  "version": "1.0",
  "environment": "production"
}
```

POST /deposits

Credit a user wallet after a collection-account deposit.

Field	Type	Required	Description
userId	string	Yes	PayForMe user ID
amount	number	Yes	Gross amount (GHS)
reference	string	Yes	Unique bank reference
partnerReference	string	No	Alternate reference
bankCode	string	No	Originating bank
description	string	No	Narration
status	enum	No	Default COMPLETED

Request

```
{
  "userId": "clx1234567890abcdefghij",
  "amount": 1500.00,
  "reference": "GCB-IN-20260725-0001842",
  "bankCode": "040",
  "description": "Wallet top-up"
}
```

Response 201 · 200 if duplicate

```
{
  "alreadyProcessed": false,
  "transaction": {
```

```
{
  "id": "clxtx987",
  "type": "DEPOSIT",
  "status": "COMPLETED",
  "amount": "1500.00",
  "fee": "30.00",
  "netAmount": "1470.00",
  "reference": "GCB-IN-20260725-0001842"
}
```

POST /withdrawals

Debit a user wallet after the bank has paid the customer.

Field	Type	Required	Description
userId	string	Yes	PayForMe user ID
bankAccountId	string	Yes	Verified linked account
amount	number	Yes	Payout amount (GHS)
reference	string	Yes	Unique bank reference
withdrawalRequestId	string	No	Link to app withdrawal
status	enum	No	Default COMPLETED

Request

```
{
  "userId": "clx1234567890abcdefghij",
  "bankAccountId": "clxbank222",
  "amount": 500.00,
  "reference": "GCB-OUT-20260725-0000911"
}
```

Response 201

```
{
  "alreadyProcessed": false,
  "transaction": {
    "type": "WITHDRAWAL",
    "status": "COMPLETED",
    "amount": "500.00",
    "reference": "GCB-OUT-20260725-0000911"
  }
}
```

POST /withdrawals/initiate

Fetch payout instructions for an in-app withdrawal.

Request

```
{
  "withdrawalRequestId": "clxwd333"
}
```

Response 200

```
{
  "withdrawalRequestId": "clxwd333",
  "reference": "PFM-WDR-20260725-88",
  "status": "PROCESSING",
  "amount": 500.00,
  "currency": "GHS",
  "payout": {
    "bankCode": "040",
    "bankName": "GCB Bank",
    "accountNumber": "1234567890",
    "accountName": "JOHN DOE"
  }
}
```

PATCH /withdrawals/{withdrawalRequestId}

Update withdrawal status after GhIPSS settlement.

Completed

```
{
  "status": "COMPLETED",
  "reference": "GCB-OUT-20260725-0000911",
  "completedAt": "2026-07-25T10:28:00Z"
}
```

Failed

```
{
  "status": "FAILED",
  "failureCode": "INSUFFICIENT_FUNDS",
  "failureMessage": "Customer account could not be credited"
}
```

POST /charges

Debit a linked bank account for installments or mandates.

Field	Type	Required	Description
-------	------	----------	-------------

reference	string	Yes	Unique charge reference
userId	string	Yes	PayForMe user ID
bankAccountId	string	Yes	Linked account
amount	number	Yes	Amount (GHS)
chargeType	enum	Yes	INSTALLMENT · INVOICE · MANDATE
installmentId	string	Conditional	For INSTALLMENT
mandateId	string	Conditional	For MANDATE
description	string	No	Narration

Request

```
{
  "reference": "GCB-DD-20260725-0044",
  "userId": "clx123",
  "bankAccountId": "clxbank222",
  "amount": 850.00,
  "chargeType": "INSTALLMENT",
  "installmentId": "clxinst444",
  "mandateId": "clxmand555",
  "description": "Rent installment #3"
}
```

Response 202

```
{
  "chargeId": "clxcharge666",
  "status": "PROCESSING",
  "reference": "GCB-DD-20260725-0044"
}
```

GET /transactions/{reference}

Reconciliation lookup by bank or platform reference.

Response 200

```
{
  "reference": "GCB-IN-20260725-0001842",
  "type": "DEPOSIT",
  "status": "COMPLETED",
  "amount": "1500.00",
  "userId": "clx123",
  "createdAt": "2026-07-25T10:15:00Z",
}
```

```
"completedAt": "2026-07-25T10:15:01Z"
}
```

GET /users/lookup

Resolve `userId` from account details (missing deposit reference).

Query	Required
accountNumber	Yes
bankCode	Yes

Response 200

```
{
  "userId": "clx123",
  "fullName": "John Doe",
  "email": "j***@example.com",
  "defaultBankAccountId": "clxbank222"
}
```

POST /mandates/callback

Report mandate lifecycle updates.

```
{
  "mandateId": "clxmand555",
  "providerReference": "BANK-MAND-9988",
  "status": "ACTIVE",
  "activatedAt": "2026-07-20T08:00:00Z"
}
```

Status	Meaning
ACTIVE	Mandate approved
REJECTED	Mandate declined
REVOKED	Mandate cancelled
EXPIRED	Mandate lapsed

POST /api/webhooks/bank

Async events (alternative to polling / PATCH).

Event	Purpose
deposit.completed	Wallet credit confirmed

deposit.failed	Deposit failed
withdrawal.completed	Payout confirmed
withdrawal.failed	Payout failed
charge.completed	Direct debit succeeded
charge.failed	Direct debit failed

Example

```
{
  "event": "deposit.completed",
  "reference": "GCB-IN-20260725-0001842",
  "userId": "clx123",
  "amount": 1500.00,
  "status": "COMPLETED",
  "completedAt": "2026-07-25T10:15:00Z"
}
```

Response 200 : { "received": true }

Error codes

Code	HTTP	Description
BANK_API_UNAUTHORIZED	401	Invalid API key
BANK_API_DISABLED	503	API not configured
VALIDATION_ERROR	400	Invalid payload
USER_NOT_FOUND	404	Unknown user
BANK_ACCOUNT_NOT_FOUND	404	Unknown or unverified account
INSUFFICIENT_BALANCE	400	Wallet overdraw
DUPLICATE_REFERENCE	409	Reference conflict
MANDATE_INACTIVE	400	Mandate not active
